Profile

Java/Kotlin backend developer, who likes to take part in all parts of software development cycle. I love agile methodologies, responsible developers and to share knowledge with others.

Experience

STAFF ENGINEER, MTS BANK (INVESTMENTS). 2022-CURRENTLY

Forming processes in product teams. Trying to understand investments business domain and translate it into code.

- Onboarded two product teams
- Set up a process for working with bugs
- Formed backend dev community consisting of 10 developers

STAFF ENGINEER, SBERBANK. 2021-2022

Managed and mentored a team of 10 developers. Experimented with mono -repos and -liths.

- Taught two interns to the level of junior+
- Migrated Java codebase to Kotlin to fix maintenance problems of reactive frameworks

JAVA DEVELOPER, SBERBANK. 2018-2021

Developed search and recommendation systems for Sberbank Online mobile application. Had fun as a scrum master during this time.

- Designed and implemented a system that allows users, using natural language queries, to find what they need
- Built from scratch CI / CD, acceptance and load testing processes that were used in several teams

JAVA DEVELOPER, STACKSOFT. 2016-2018

Maintained billing integration platform.

- Developed an integration testing approach that reduced the number of errors when adding new integrations

Education

Russian State University of Oil and Gas. Software Engineer, 2015

Skills

Java, Kotlin, Spring Boot, Kafka, PostgreSQL, Kubernetes, Mentoring, Agile methodologies
